

DARK WEB MONITORING & PHISHING TRAINING

Pricing varies depending on number of users – starting at \$49/month

DARK WEB MONITORING

We monitor the Dark Web and the criminal hacker underground for exposure of our clients' credentials to malicious individuals 24/7, 365 days a year to identify stolen credentials and other personally identifiable information (PII). We are instantly alerted of any leaks so we can help clients prevent a breach before it occurs.

E-MAIL PHISHING TRAINING & SIMULATED CAMPAIGNS

Customized phishing attack scenarios are generated, recreating a variety of such real-world attack techniques as: Spear phishing, social engineering, malware and malicious attachments, and advanced conversational phishing attacks. Includes security awareness training campaigns to educate employees on how to avoid such attacks, along with statistical reporting to the company for phishing simulation and training/awareness campaign results.
